

Quality Policy

We recognize that the maintenance of defined quality standards in all aspects of performance is critical to our success. To meet the stated and implied needs of our customers requires a close working relationship to define those needs and then follow a quality system to deliver them cost effectively within a planned time frame. Our belief is that in addition to safety, quality should lie at the heart of our employees' everyday work.

We are committed to:

1. Comply with legislation, regulations, and codes of practice relevant to the industry sector in which we operate.
2. Be perceived by our customers as a company whose products, services and support consistently exceed their expectations.
3. Continuously improve our products, services and processes using clearly defined methodologies.
4. Establish and communicate meaningful quality objectives and performance targets to all staff, driving continuous improvement.
5. Invest in both equipment and people to provide our customers with innovative and cost-effective solutions to their geophysical survey needs.
6. Make quality a core responsibility of every staff member ensuring they understand and conform to the requirements of the company's Quality Policy and to its systems and procedures.
7. Develop our employees' skills and maximize their contribution through effective leadership, motivation, and training.
8. Encourage our staff to contribute to continuous improvement.
9. Work with our major contractors and suppliers to ensure quality delivery of their services such that they support and not hinder our operations.
10. Regularly monitor and review how we manage quality to continuously improve its effectiveness and ensure lessons learned are applied.

This policy provides a framework for setting quality objectives.
